300kW inverter output voltage

Overview

The product provides stable AC output power for both grid-connected (300kW, 360V-440Vac) and off-grid (300kW, 400Vac) modes, with low THDu (<1% linear, <5% nonlinear) and high overload capacity (110% long-term). This 300kW three-phase inverter demonstrates best-in-class system-level power density and efficiency obtained by using Wolfspeed's new XM3 power module platform. The XM3 power module platform is optimized for SiC MOSFETs in a high-density; low-inductance footprint; which reduces system-level losses. Off Grid System with Pure Sine Wave Inverter (No Battery) Please complete the fields below to send your friend a link to this product. Your friend will receive an email from you with a link to our site. It features Type II SPD protection, AFCI (optional), and PID mitigation for enhanced safety. Short Circuit Current per MPPT Max. With AC reactor (Protect against city power current shock) 2.
