

## PEES Power Systems

# Accra electricity distribution

## Overview

---

At the forefront of electrification is the Greater Accra region, boasting a near-universal access rate of 99. This statistic not only reflects the region's economic vitality but also its administrative prominence as the heart of Ghana. Individual/localised outages and incidents of fallen or sagging conductors within customers' vicinities should be reported to the ECG Call Center on 0302-611611, the nearest ECG office, or reach us on our social media handles via @ECGghOfficial on Facebook, X, or Instagram for prompt intervention. The Africa Centre for Energy Policy (ACEP) was established in 2010 to contribute to development of alternative and innovative policy interventions through high quality research, analysis and advocacy in the energy and extractives sector in Africa. It enables users to report challenges, share feedback on local power issues, and access reliable data on electricity generation, transmission, distribution, access, and consumption. The responsibility of the Electricity Company of Ghana (ECG) is to distribute electricity. In addition, the ECG constructs, installs, assembles, repairs, operates or removes sub-transmission stations, electrical appliances, fittings, and electrical installations. Renewable energy and security solutions for homes and businesses. The Power System of Ghana is run by three utility companies; the Volta River Authority (VRA), Ghana Grid Company Limited (GRIDCO) and the.
