

## PEES Power Systems

**Are all the roofs of the terminal buildings photovoltaic panels**

## Overview

---

The Terminal One solar array consists of 13,000 panels spanning the terminal roof, generating 6. The array will work in tandem with 3. 34 megawatt-hour battery energy storage system, creating one of the most advanced microgrids. The 7. Add us as a Google Preferred Source to see more of our articles in your search results. Kennedy International Airport (JFK) is embarking on a cutting-edge renewable energy project as part of its \$19 billion transformation initiative led by the Port Authority of New York and New Jersey (PANYNJ). Credit: Port Authority of New York and New Jersey JFK International Airport in New York, US has begun. More than 13,000 solar panels will be installed on the roof of the New Terminal One project at John F. The consortium chosen to build the project, led by AlphaStruxure, on September 24 said construction is underway.

### JFK International Airport's New Terminal One to host largest airport

Construction has begun on New York City's largest solar array to date, comprising over 13,000 solar panels on the roof of John F. Kennedy International Airport's New Terminal One as part ...

### Construction begins on massive solar project on roof of new JFK ...

Construction has begun on a new terminal at John F. Kennedy International Airport (JFK), which will host a 13,000-panel solar array on its roof. The Terminal One solar array will be the ...

### Port Authority of New York & New Jersey, New Terminal One at JFK, ...

It will feature the largest rooftop solar array in New York City and on any airport terminal in the United States. The array will consist of around 13,000 solar panels, covering roughly 370,000 ...

## Construction Begins on New York City's Largest Solar Array, Covering

More than 13,000 solar panels will be installed on the roof of the New Terminal One project at John F. Kennedy International Airport (JFK) in New York City. The consortium chosen to ...

## How JFK's Terminal One Solar Microgrid is Creating a Model for

The Terminal One solar array consists of 13,000 panels spanning the terminal roof, generating 6.63 MW of electricity. The array will work in tandem with 3.84 MW of fuel cells and a 1.5 MW (3.34 megawatt ...

## JFK International building largest airport solar array in US

JFK International Airport in New York, US has begun construction on an array of 13,000 solar panels on the roof of its new Terminal One building as part of the sustainable power grid being ...

## PANYNJ & The New Terminal

## One Consortium Kick Off Construction ...

The New Terminal One rooftop solar canopy will be the largest such solar array at any U.S. airport, providing a valuable case study for both the aviation and solar energy industries due to ...

---

## PORT AUTHORITY AND THE NEW TERMINAL ONE CONSORTIUM ...

The New Terminal One is being built on sites now occupied by JFK's Terminal 1, the recently closed Terminal 2, and the former Terminal 3, where it will anchor the international airport's

---

## JFK's new Terminal One to boast New York City's largest solar array

According to the Port Authority of New York and New Jersey and the New Terminal One consortium that was selected to design, build and operate the new terminal, the solar array will be ...

---

## New JFK terminal will utilize novel microgrid, NYC's largest solar array

The microgrid will include the largest solar canopy in New York City and the biggest at any U.S. airport- a 6.63 MW array containing more than 13,000 panels, blanketing an area the size of ...
