Are solar battery cabinet lithium battery packs prohibited items

Overview

As of Ma, new TSA rules prohibit passengers from packing portable chargers, power banks, and cellphone battery charging cases that contain lithium-ion batteries in checked luggage. This rule also applies to spare external lithium batteries. From lithium batteries to aerosol whipped cream, many items used every day at home or work are regulated as hazardous materials (a. "hazmat" and "dangerous goods"). These products may seem harmless; however, when transported by air they can be very dangerous. In fact, a lithium battery fire caused the crash of UPS Flight 6 in 2010, which was a Boeing 747 that was known for carrying huge cargo loads and was carrying several pallets containing. Gas-powered generators are only accepted as checked items if they are new, unused, and in original packaging.
