About Electricity Storage  
Electricity Storage in The United States  
Environmental Impacts of Electricity Storage  
According to the U.S. Department of Energy, the United States had more than 25 gigawatts of electrical energy storage capacity as of March 2018. Of that total, 94 percent was in the form of pumped hydroelectric

storage, and most of that pumped hydroelectric capacity was installed in the 1970s. The six percent of other storage capacity is in the for See more on [epa.gov](http://epa.gov)
