Beijing makes inverters for solar container communication stations

Overview

Undocumented communication devices have been discovered inside solar inverters and batteries manufactured in China, according to two sources familiar with the matter. Energy officials are reportedly reassessing the security risks posed by Chinese-made components in renewable energy infrastructure after discovering hidden communication devices inside certain solar inverters. A Reuters investigation, citing two individuals familiar with the matter, revealed. Hidden cellular technology in Chinese-made solar inverters allows unauthorized remote access, bypassing security measures and enabling potential grid attacks. The inverters are part of the hardware package connecting solar arrays to the power.

Hidden tech in Chinese solar inverters gives Beijing the power to

The incident exposed a chilling reality: Chinese-made solar inverters, critical components in renewable energy systems, contain hidden cellular technology that allows remote ...

Energy officials find unauthorized communication devices in Chinese

U.S. energy officials have found "unexplained" communications equipment inside some Chinese-made inverter devices, according to a report by Reuters published Wednesday.

Hidden Communication Devices Found in Chinese-Made Inverters ...

For months, experts examining renewable energy equipment imported from China have been quietly finding rogue components in solar inverters and large batteries, two people familiar with ...

Chinese hold on solar-power tech raises fresh sabotage fears in Europe

The undisclosed devices were reportedly found during a routine disassembly of Chinese-made power inverters, which serve to connect solar farms to the electricity grid, control the flow of ...

Rogue communication devices found in Chinese solar power inverters

The two people declined to name the Chinese manufacturers of the inverters and batteries with extra communication devices, nor say how many they had found in total.

Undocumented Communication Components ...

Undocumented communication devices have been discovered inside solar inverters and batteries manufactured in China, according to two sources familiar with the ...

Undocumented Communication Components Discovered In Chinese Inverters

Undocumented communication devices have been discovered inside solar inverters and batteries manufactured in China, according to two sources familiar with the matter.

Chinese energy tech exports found to contain hidden comms and ...

Rogue communication devices have been discovered in Chinese made solar inverters, devices which play a 'critical role' in renewable energy infrastructure, Reuters reports. This has ...

Ghost In The Machine? Rogue Communication Devices Found In

US energy officials are reassessing the risk posed by Chinese-made devices that play a critical role in renewable energy infrastructure after unexplained communication equipment was found inside

US uncovers hidden radios in Chinese solar inverters, sparks

alarm

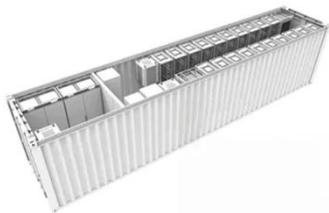

U.S. energy officials are reportedly reassessing the security risks posed by Chinese-made components in renewable energy infrastructure after discovering hidden communication ...
