# Buenos Aires Road Solar Electricity System

## Overview

---

The project, developed by **Buenos Aires Energía S. 6 MW** and an estimated annual production of **7,500 MWh**, enough to supply more than **2,000 households** in. The Province of Buenos Aires advances in its energy transition with the awarding of five new solar parks. 4 million, the works. The north of Argentina experiences high levels of solar radiation and has the capacity to produce electricity and jobs for rural and underserved communities in the country. Unfortunately, there are several factors limiting the total deployment of renewable energy in Argentina. A solar plant is being built on the roof of the Centro Ambiental de Recomposición Energética (CARE) in La Matanza, promoting decentralized electricity production in Buenos Aires. Traditional fossil fuels have long been the primary energy source for. Coca-Cola FEMSA Argentina has inaugurated the country's largest solar carport at its Northern Distribution Center in Buenos Aires. Designed and installed by YPF Solar with support from TAMA, the 429.3 kW system features 734 bifacial panels and generates about 527.6 MWh annually—enough to power 120.
