

## PEES Power Systems

# Can I use the electricity from photovoltaic panels myself

## Overview

---

Most DIY solar installations are self-sustaining, with a charge controller (or regulator), battery, and inverter. Able to generate, store, and export emission-free electricity, DIY solar can be a great remote solution for off-grid properties. This guide will walk you through. Installing your own solar panels can be legal and cost-effective, but navigating the regulations requires careful planning. 3% of the 1,000 homeowners surveyed chose to install panels themselves. 15 kilowatts direct-current with a 3-11 kilowatt range. According to SETO awardee EnergySage, that's enough power to meet all the energy needs for an average home in Austin, Texas.

## Can I use the electricity from photovoltaic panels myself

---

**You have the right to make energy from the sun. Here's why.**

Making your own electricity without interference is a basic property right. Common law allows you to do what you want on your property as long as it doesn't harm other people.
