## Overview

---

Solar panels can get defects like cracks, hotspots, discoloration, and wiring problems. This lets you fix them before they get worse. To decide if your broken solar panel needs repair or replacement, balance the repair cost against the replacement price. These issues reduce overall efficiency and may lead to more expensive repairs if not addressed promptly. Cracks, chips, or fractures can occur due to various reasons, such as hail storms, falling debris, or improper handling during installation or maintenance. Here are a few common solar panel problems and solutions- 1.
