

PEES Power Systems

Can stores use solar power

Overview

Rather than relying entirely on grid electricity, retailers install solar panels to capture sunlight and convert it into clean electricity that powers their operations directly. Rooftop Solar Systems are the most common installation type for retail businesses. From cutting down electricity bills to showing customers a commitment to sustainability, solar power offers grocery stores a range of advantages. The Retail/Big Box stores consume 189,000 kWh annually (based on 13,500 square feet) — nearly double the energy usage of typical warehouse operations. Shoppers increasingly choose brands that demonstrate a. To begin with, invest in solar power to reduce your electricity bills and move towards grid independence.
