# Edge Computing Lithium Battery Cabinet

## Overview

---

Designed to exceed IFC24 fire-containment standards, it enables secure storage of bulk, damaged, or prototype batteries without the need for a separate fire-rated room. Lightweight, mobile, and field-repairable, the cabinet combines long-term durability with sustainable. The Vertiv™ EnergyCore Li5 and Li7 battery systems deliver high-density, lithium-ion energy storage designed for modern data centers. Purpose-built for critical backup and AI compute loads, they provide 10–15 years of reliable performance in a smaller footprint than VRLA batteries. With advanced. Rack lithium batteries are an excellent power protection solution for edge computing infrastructure, offering benefits such as high power density for a compact footprint, longer lifespan reducing total cost of ownership, increased efficiency, and minimal maintenance. These meticulously designed lithium-ion battery storage containers provide Lithium-ion Battery Safety, including 90-minute fire resistance against external sources.
