# Electric vehicle policy budapest

## Overview

---

Vehicles with green license plates—classified as 5E (100% electric), 5N (PHEV), 5P (electric  $\geq 50$  km range), or 5Z (zero emission)—are exempt from registration tax. From 2025, hybrids and PHEVs are no longer exempt. For instance, regular hybrids now pay around €209 in registration. Costs related to purchasing and installing electric charging infrastructure are deductible from corporate tax, promoting investment in workplace BEV support. As of 5 February 2024, Hungary launched a company-only BEV subsidy programme with a total budget of €79. The corporate BEV subsidy. One of the biggest advantages of electric cars is that they cause no local emissions, and the biggest beneficiaries of this would be city dwellers, whose health is not taken into account in similar regulations. The reasoning behind the new regulation is complex and equates plug-in hybrids with pure. To promote sustainable urban mobility and reduce environmental pollution, transportation policies worldwide aim to decrease reliance on fossil fuels. These initiatives will make EVs more accessible and attractive to consumers, further driving the market's growth.
