Electric vehicle safety senegal

Overview

Senegal will implement a regulatory framework to promote and regulate the use of electric vehicles in the country. These changes aim to support EV adoption while addressing safety, compliance, and cost concerns. Key updates include: Battery Safety Standards: New rules focus on battery safety and hazardous material. In a significant stride towards reducing its carbon footprint, Senegal is taking decisive steps to transition to electric mobility, thanks to the collaborative efforts of Manufacturing Africa (MA) and the Government of Senegal. Announced by Minister of Infrastructure, Land and Air Transport Malick Ndiaye on July 15, the framework will be established with the support of UK-based company Manufacturing Africa.
