# Energy storage economics republic of china

## Overview

---

Battery and battery-energy-storage system exports have hit new highs, seeing a year-on-year growth of 24% for the first three quarters of 2025, according to Reuters. The industry is adapting to the domestic market and looking to expand internationally. Inside the Huadian energy storage plant in China's north-central city of Delingha, Qinghai province. It is currently the largest single electrochemical storage facility in the country (Image: Ma Mingyan / China News Service / Alamy) In February 2025, China shelved a requirement that new domestic. China's energy storage sector is navigating a storm of geopolitical tensions and market saturation, threatening its ambitious growth plans. As a solution to balancing the country's growing energy needs and mass renewable energy production, the industry has attracted investments worth hundreds of billions of yuan (tens of billions of dollars).
