Environmental sustainability harare

Overview

The Harare Sustainable City Initiatives aims at enhancing the overall well-being, health, and living conditions of Zimbabwe citizens through access to sustainable and low carbon urban basic services from sustainable solid waste management and the use of renewable energy systems. Are you searching for Environmental sustainability Conferences in Harare 2026?

You have subscribed to International Conference alerts that provide you with latest updates of the forthcoming Environmental sustainability conferences in Harare focusing on for 2026 and also details of important events. Harare, Zimbabwe – Harare, the capital of Zimbabwe, is fast becoming a key player in the battle against climate change, developing innovative approaches to tackle waste management, restore degraded ecosystems, and promote sustainable urban planning. Like many other cities across the globe, Harare. UN-Habitat is mandated by the General Assembly to ensure adequate shelter for all and to promote sustainable urbanisation globally. UN-Habitat carries both. START International, in partnership with EPIC-N, commissioned a mini-documentary highlighting the impactful work taking place in Harare through the collaborative efforts of Chinhoyi University of Technology and its partners. From 143,000 in 1950 to over 1.4 million in 2022, this rapid urbanisation has increased demand for housing and infrastructure, placing considerable pressure on the city's resources. This initiative, which brings together government representatives, local authorities, civil society, and private sector players, seeks.
