Environmental sustainability ulaanbaatar

Overview

The present strategic action plan (GCAP) is a key development milestone for Ulaanbaatar. The GCAP is a compendium of implementable project ideas aimed at improving the environmental conditions in the city and the social wellbeing of all its citizens. The findings obtained as part of the Russian Foundation for Basic Research project, a review of the literature and reference materials, and an expeditionary survey. She argues that to successfully tackle complex environmental health risks like those brought on by air pollution, research and policymaking must be collaborative and inclusive; it requires a rebuilding of trust between local communities and decision-makers. It concludes the findings of a thorough data. Distribute knowledge on integrated water resources management and ecosystem-based climate change adaptation. As the country's capital and home to nearly half of its.
