# France electric vehicle charging infrastructure

## Overview

---

As of now, France is home to over 120,000 charging points, making it the third-best-equipped country in Europe for EV infrastructure, trailing only behind the Netherlands and Germany. The electric vehicle (EV) and charging infrastructure market in France is anticipated to experience a 15% annual growth, reaching USD 22. This robust growth trajectory follows a strong performance from 2020 to 2024, with a CAGR of 18. France has ambitious environmental targets, and is legally bound to achieve carbon neutrality by 2050.
