Generator cabinet manufacturing standards

ESS

Overview

Issued by UL, a globally recognized safety science company, the standard outlines the construction, performance, and testing criteria that ensure generator sets meet specific fire, electrical, and mechanical safety requirements. When it comes to industrial generators, several key organizations establish the standards that protect workers, the environment, and equipment. Adhering to these is the first step in demonstrating expertise and trustworthiness. OSHA (Occupational Safety and Health Administration) OSHA's mission. UL2200 is the Underwriters Laboratories safety standard for stationary engine generator assemblies.
