

PEES Power Systems

Grenada has a large number of solar panel manufacturers

Overview

The chart below describes and reviews some of the current renewable energy options we have investigated, along with their advantages and disadvantages for Grenada. Technology Snapshot A solar electric system converts sunlight into electricity using solar cells. Entrepreneurs exploring new manufacturing ventures in Grenada are often drawn to its vibrant tourism, rich agriculture, and strategic Caribbean location. But while these factors are compelling, an energy-intensive operation like a solar panel factory faces a more critical question: How reliable is. The sole provider of electrical energy to the islands of Grenada, Carriacou, and Petite Martinique is Grenada Electricity Services Ltd. GRENLEC is a government-owned company that was established in 1994. Grenlec is committed to diversifying Grenada's energy portfolio while providing safe, reliable, high quality, affordable electric service for everyone. Through a thoughtful, prudent approach, our goal is to stabilise electricity prices in the short-term, and potentially lower prices in the future. How does 6Wresearch market report help businesses in making strategic decisions?
