How to install photovoltaic panels without a roof

Overview

There are three options for solar energy to decarbonize your life: 1) rooftop solar; 2) utility renewable energy programs (which probably also include wind and possibly hydro); and 3) subscription to a community solar project somewhere in your region. But roof panels have one big disadvantage: They are attached to your roof. This can complicate roof repair, maintenance, and replacement—and not all roof systems are ideal for solar panel placement. Solar. The traditional method of installing solar panels involves placing them on the roof of a building. Not every home can choose rooftop solar system installations. Are you doing a solar project?
