# Installation of special canopy for solar inverter

## Overview

---

☐☐ String Inverter Canopy Structure Installation Work in Progress\*☐☐ In this video, we showcase the ongoing installation work of the canopy structure designed to protect string inverters at the solar plant site. A solar canopy is a raised structure that holds solar panels—technically called a photovoltaic (PV) structure) —above open spaces like parking lots, rooftops, patios, or walkways. It lets you generate solar energy without giving up usable space. Thanks Hi @Sugar, Thank you for your question about protecting your solar inverter from the elements. The first thing you'll need to consider is that solar inverters generate heat during operation, so they need adequate airflow around them to. Have you tried out dark mode?

! Scroll to the bottom of any page to find a sun or moon icon to turn dark mode on or off! Covering for outdoor inverter - awning/shade?

I am getting an outdoor rated inverter+battery to install on an outdoor wall. “When designing solar carports, selecting the right inverter is key to maximizing energy production and system reliability, which is why some are turning to microinverters.
