

PEES Power Systems

Kingston Resort uses IP66 three-phase battery cabinet

Overview

KDST provides high-performance battery energy storage cabinet solutions, specially designed for key applications such as telecom base stations, industrial control, and power systems. The cabinet meets the IP65 protection level and features excellent heat dissipation. Most industrial off-grid solar power systems, such as those used in the oil & gas patch and in traffic control systems, use a battery or multiple batteries that need a place to live, sheltered from the elements and kept dry and secure. The control room is considered one of the most critical areas in any facility, impacting daily decision-making and overall. And with Alpha 1 Pro's battery management system and smartphone monitoring, you always know how much. Highlights

- 100-Amp-Hour Capacity: Plenty of power for RVs, off-grid cabins, and marine setups.
- Bluetooth Monitoring: Check battery status in real time from your smartphone - no more guesswork.
