# Kulchu Solar Power Generation

## Overview

---

Slated to be the world's largest hybrid renewable energy park, [1] it is being built on 72,600 hectares (179,000 acres) of waste land. [1][2] It is expected to generate 30 gigawatts (GW) from solar panels and wind turbines, enough to power 18 million Indian homes. With that, Reliance began work on a new integrated renewable energy manufacturing hub named after the group's founder - the Dhirubhai Ambani Green Energy Giga. Reliance Industries Chairman Mukesh Ambani has unveiled plans to set up one of the world's largest single-site solar power projects in Kutch, Gujarat. The area spread across 5,50,000 acres of arid land. This is nearly three times the size of Singapore. One such impactful story comes from Kutch, Gujarat, where Kosol Energie, a prominent module. India's journey toward a sustainable energy future has taken a monumental leap with the launch of the 30 GW Gujarat Hybrid Renewable Energy Park in the Kutch district. Positioned near the Vighakot BSF post along the international border, this ambitious project aims to redefine the country's. Reliance has completed key groundwork in Kutch as part of its plan to start large-scale solar generation by early FY26. ## Gujarat Hybrid Renewable

## Energy Park

The Gujarat Hybrid Renewable Energy Park or Khavda Solar Park is a renewable energy park under construction near Vighakot village in Kutch district of Gujarat, India. Slated to be the world's largest hybrid renewable energy park, it is being built on 72,600 hectares (179,000 acres) of waste land. It is expected to generate 30 gigawatts (GW) from solar panels and wind turbines, enough to power 18 million Indian homes. 1 GW capacity was commissioned in March 2024.

## Reliance to Build 5,50,000-Acre Solar Project in Kutch, Says Mukesh

Within the next decade, the project could generate enough power to meet almost 10% of India's electricity needs. The facility will be integrated with Reliance's existing marine and land
