|---|---------------------------|----|---------------------------|
| 1 | PCS Module | 6 | OPV2 side circuit breaker |
| 2 | Battery room | 7 | High Volt Box |
| 3 | Grid side circuit breaker | 8 | BAT side circuit breaker |
| 4 | Load side circuit breaker | 9 | LCD display screen |
| 5 | OPV1 side circuit breaker | 10 | MPPT |

Overview

The short answer is yes: You can absolutely use solar panels without battery storage. In fact, the majority of residential solar installations in the U. are “grid-tied” systems without batteries (although solar + battery systems are becoming more and more common). A battery backup system works as a reliable safety net for your home's power needs. But here's the big question: can you power your home with a battery. Rhythm Energy offers 100% solar plans that empower anyone—homeowner, renter, or business—to support renewable energy without rooftop panels. Maybe you live in an apartment where drilling into a shared roof isn't allowed.

No solar power installed
