

PEES Power Systems

Northeast solar panels photovoltaic panels

Overview

Solar panels collect the energy derived from the sun's rays through the form of solar radiation. Solar powered electric generation relies on photovoltaics (aka "PV"). That's why we call solar panels "PV panels". Our Energy Solutions Capabilities can assist you in saving energy and reducing costs. NorthEast Electrical can help provide Solar PV for residential, commercial, and utility-scale applications. We assist solar EPC's & installers throughout New England in procurement and on-time completion of solar. Northeast Solar has been designing and installing solar out of our Hatfield office for over ten years. Solar technology has changed a lot in that time, but we've always stayed true to our core values that put the customer experience front and center.
