# Photovoltaic energy storage connector scale

## Overview

---

SOLARLOK connectors are engineered to minimize power loss and maximize efficiency, whether on residential rooftops, commercial buildings, utility-scale solar farms, or building-integrated photovoltaics (BIPV). High-quality connectors are critical for photovoltaic (PV) performance and safety. New levels of convenience with LPT series PCB terminal blocks. An additional application for large-scale storage systems is the storage or provision of energy in many applications they are being used for. Unlike standard electrical connectors, these specialized devices must be designed to: Modern. Photovoltaic connectors, often referred to as solar connectors, are specialized components used to link solar panels together and connect them to the rest of the solar power system.
