# Photovoltaic energy storage is better

## Overview

---

Energy storage and solar photovoltaics each present unique strengths and drawbacks relevant to their applications in renewable energy systems. When evaluating their effectiveness, 1. Solar photovoltaics enable. The AES Lawai Solar Project in Kauai, Hawaii has a 100 megawatt-hour battery energy storage system paired with a solar photovoltaic system. Sometimes two is better than one. Coupling solar energy and storage technologies is one such case. And when the photovoltaic power generation and energy storage system combination, this “photovoltaic plus storage” energy solutions, not only further enhance the application of solar energy benefits, but also for the efficient use of energy to provide a new possibility.
