

## PEES Power Systems

# Photovoltaic panels stick out of the roof

## Overview

---

Common causes include incorrect mounting penetrations, inadequate sealing, poor choice of fasteners, and failure to account for roof age. Cumulative water intrusion from many small penetrations or compromised flashing is often the primary mechanism of damage. Solar panels are a popular choice for homeowners looking to reduce their carbon footprint and save on energy costs. However, installing solar panels on roofs can come with its own challenges and potential problems. In this comprehensive guide, we will explore the nine most common problems that can. The installation of rooftop solar can save money and cut emissions, but when panels appear to have damaged a roof it becomes a serious problem. Besides these, installation of solar panels may necessitate additional expenses like repair or strengthening of the roof to bear its weight or rewiring of the switchboard. Mounting solar panels on a roof surface to create a solar power system is known as rooftop solar mounting. Firstly, the weight of the panels and.
