Plante lead acid battery

Plante lead acid battery

One of the First Rechargeable Batteries, about 1860

The first practical lead-acid storage battery. Made by Gaston Planté in London around 1860.

About the Planté Battery

Planté battery is the foundation of the modern-day lead-acid battery. Today, there are two main categories of 12V (derived from Planté's nine-cells capable of producing 18V) lead-acid batteries.

Who Invented The Lead Acid Battery?

In 1859, Planté introduced the world to the first rechargeable battery: the lead-acid battery. His design consisted of two lead sheets, separated by rubber strips, rolled into a spiral and immersed in a ...

Gaston Planté , Battery

inventor, Lead-acid cell, ...

In 1859 Planté began experiments that resulted in construction of a battery for ...

Scientist of the Day

In 1859, he invented the lead-acid battery. The battery had been around since 1800, when Volta put together his first "Voltaic pile," but Planté's battery was the first battery that could be recharged, and it ...

Gaston Planté , Battery inventor, Lead-acid cell, Electric storage

In 1859 Planté began experiments that resulted in construction of a battery for the storage of electrical energy; his first model contained two sheets of lead, separated by rubber strips, rolled into a spiral, and immersed in ...

Gaston Planté and his invention of the lead-acid battery--The ...

In 1860, the Frenchman Gaston Planté (1834-1889) invented the first practical version of a rechargeable battery based on lead-acid chemistry--the most successful secondary battery of all ages.

Lead-Acid Battery

The lead-acid battery was a foundational invention in the field of electrical energy storage. French physicist Gaston Planté's design in 1859 was simple yet effective, consisting of two lead sheets separated by rubber ...

Planté Battery - 1859

In 1860, Planté demonstrated for the French Academy of Sciences a series of nine connected cells, but today the most common lead-acid batteries, as they're also called, contain six cells for a combined voltage of 12V.

Gaston Planté

Gaston Planté (French pronunciation: [ɡastɔ̃ plɑ̃tɛ]; 22 April 1834 - 21 May 1889) was a French physicist who invented the lead-acid battery in 1859.

This type battery was developed as the first ...
