

PEES Power Systems

Pretoria battery recycling

Overview

At BSI Energy Solutions, we offer top scrap prices, reliable transport for scrap collection, and complete legal certification for cradle-to-grave processes. Partner with us for seamless and profitable battery disposal. We prioritize eco-friendly disposal methods to minimize. National Environmental Management Waste Act compliance ensuring environmentally responsible disposal and recycling of lithium-ion battery components. Recycling end-of-life batteries supports circular-economy goals, reduces reliance on virgin mining, and ensures you meet Extended Producer Responsibility (EPR) and hazardous-waste regulatory obligations. Join us in making a positive impact on the planet. Recycling is an extremely important consideration for Battery Centre, not only for the recovery of valuable materials, but also for the on-going protection of the environment. Automotive battery components, such as lead, plastic and acid are harmful to our environment unless properly treated.
