# Russia invests in energy storage power station project

## Overview

---

Russian President Vladimir Putin announced plans to build two pumped storage power plants in Uzbekistan during negotiations with President Shavkat Mirziyoyev on May 27. The initiative aims to bolster energy cooperation between the two countries and enhance Uzbekistan's energy. Russia is making significant investments in energy storage technologies, demonstrating promising advancements in battery production, energy management systems, and renewable energy integration. The government has launched initiatives to diversify energy sources, focusing on sustainability. Russia's state nuclear company, Rosatom, is pursuing fresh investment talks to sell nearly half of its stake in Türkiye's \$25 billion Akkuyu Nuclear Power Plant (NPP), as the project approaches its first power generation milestone. "There are good prospects for cooperation in hydropower. No discussion about Russian energy storage is complete without mentioning the Zagorsk Pumped Storage Plant - the equivalent of a nuclear-powered.
