

## PEES Power Systems

**Russia s energy storage  
product exports will be  
restricted**

## Overview

---

These designations aim to significantly limit Russia's ability to generate revenue from its energy resources. The EU has prohibited the import of seaborne crude oil and refined petroleum. Russia faces fuel shortages and price hikes after Ukrainian attacks on oil refineries, prompting export restrictions on gasoline and diesel. Central Asian countries like Tajikistan, Kyrgyzstan, and Uzbekistan are heavily impacted, with Tajikistan hit hardest due to its reliance on Russian imports. By law, our data, analyses, and forecasts are independent of approval by any other officer or employee of the U. Russia's energy overview, 2023 Data source: U. Energy Information. In 2021, total Russian gas imports to the EU totalled 150 billion cubic metres (bcm) per year, or 45% of its total imports, and have fallen to 52 bcm or 19% since, according to the European Commission. This change increases our tracker's estimate of exports from Russia to the world by EUR 77.

## Russia's energy storage product exports will be restricted

---

### Sanctions on energy
