Self-installed photovoltaic solar panels

 **LFP 12V 100Ah**

Overview

A DIY solar kit allows you to self-install a fully functional solar energy system for your home. DIY solar electricity is essentially the same as a solar system installed by a contractor, you're just doing the installation yourself!. DIY solar kits ensure a seamless and straightforward transition to solar, providing all the essential components you need to set up solar power for your home and start lowering your utility bill. Generally, our DIY solar kit includes solar panels, micro inverters or a string inverter, solar panel racking, solar panel cables, surge protectors, a combiner. Solar panel kits bring the eco-conscious and cost-saving advantages of solar power directly to the hands of DIYers. Standard solar panel systems can be prohibitively expensive and complex to install.
