Smart solar energy storage cabinetized schools in afghanistan

Overview

UNICEF is constructing 165 schools for girls and boys across Afghanistan, complete with solar panel systems, latrine blocks, handwashing stations and drilled water wells. In Nazyan district, Afghanistan, 18 miles from Jalalabad city near the Pakistan border, the majestic Spin Ghar (White Mountains) Range is a silent. Access to reliable and sustainable energy is more than just convenience, it's a lifeline that transforms communities. Shukria, a 12-year-old fifth grader, washes her hands at Soroubi Girls' School in Nazyan district, Nangarhar, Afghanistan on. The UN Development Programme said over 6,400 facilities, including schools and clinics, across Afghanistan have been equipped with solar energy since 2021. These installations provide a combined capacity of 1,335 kilowatts of electricity, according to a statement.
