

PEES Power Systems

Solar energy suddenly stops generating electricity

Overview

This guide explains the most common reasons why your solar panels may not be generating power, and how to troubleshoot both rooftop systems and portable solar generators used for camping, home backup, off-grid living, or outdoor activities. Every second your solar energy system is down costs you money, so it's important to fix your solar panels as soon as you notice your solar panels are not producing full power. To help, we've rounded up some of the most common solar panel problems and how to solve them. 8% annually: Quality solar panels naturally lose efficiency over time, so a system producing 10,000 kWh in year one should generate around 9,950 kWh in year two - this gradual decline is expected and warranty-covered. Check your inverter's indicator lights first - a green light means normal operation, while red or orange signals a potential issue requiring attention. If the panels are broken or the inverter isn't working properly, call a pro to.
