

## PEES Power Systems

# Solar inverter closing

## Overview

---

If an inverter keeps shutting off it is often for safety reasons. Other possible reasons are incorrect parameters, lack of power and damaged circuits. However, 2024 has brought immense challenges, with higher interest rates, tighter financing, and adverse policy shifts in key states contributing to over 100 solar bankruptcies based on our industry data, a number unseen before in our almost 20 years in the solar sector. If this has happened to you, you're definitely not alone. Inverters are designed to convert the direct current (DC) provided by a solar array or battery bank into alternating current (AC) for powering AC loads or feeding the AC into the power grid. Complete Solar purchased some of those assets in a transaction that closed on Septem, including certain assets related to the Blue Raven Solar division, the New Homes division, and.
