

PEES Power Systems

Solar panels installed on rooftops in Georgia

Overview

Rooftop solar systems are small-scale solar installations that allow people to generate carbon-free electricity, primarily for use on site. There is 4,566 megawatts of solar capacity currently installed in Georgia as of Q2 2022. 7% of the electricity in our state - nearly all. Solar panels are typically mounted on the rooftop but can also be ground mounted. The panels harness energy from the sun and converts it into usable power in your home. Customers who have already decided to install a solar system and hired a contractor should begin by placing an interconnection. Creative Solar USA is Georgia's local, family-owned solar company since 2008.
