Solar photovoltaic panel companies are in trouble

Overview

In 2025 alone, several major solar companies are going out of business, even as demand for clean energy rises. Homeowners increasingly face unsupported systems, voided warranties, and limited service options. The solar industry was heavily affected by a range of factors, like higher interest rates, legislative shifts, competition, and financing issues. Some companies. But with this expansion, has come an increasing number of disgruntled solar customers that are posting bad reviews about solar companies online, filing complaints with agencies such as the Better Business Bureau (BBB), state consumer protection departments and Attorney Generals, and even taking. Thousands of homeowners are left without repair services or support for systems installed by solar companies that later went bankrupt. California alone has over 820,000 abandoned installations, according to Solar Insure data. Many are stuck with leases for incomplete installations or systems that. The rise in solar panel bankruptcies has left many homeowners in a state of uncertainty, particularly those who invested in systems from companies like SunPower Corp.
