The latest positive news for wind power and photovoltaic power generation

Overview

Wind and solar generated 30% of EU electricity in 2025, overtaking fossil fuels at 29% for the first time. A 19% surge in solar capacity drove the milestone, whilst coal fell to a record low of 9. In our latest Short-Term Energy Outlook, we forecast that wind and solar energy will lead growth in U. solar power generation will grow 75% from 163 billion kilowatthours. The United Nations reports a global shift toward renewable energy, calling it a "positive tipping point. " FILE - Wind turbines operate as the sun rises at the Klettwitz Nord solar energy park near Klettwitz, Germany, Oct. (AP Photo/Matthias Schrader, File) NEW YORK (AP) — The global. Authorities in Vietnam have selected a unit of domestic conglomerate Vingroup to develop the 750-MW first phase of a large-scale offshore wind project off the country's Gia Lai province. When engineering renewables in politically fragile and high-risk environments, such as Afghanistan, technical. Increasing investments in solar, wind power, hydropower and biomass will be essential to reducing global reliance on coal and oil. policy shifts, with global capacity expected to more than. Sir David Attenborough explored London's wildlife for a BBC documentary aired New Year's Day, featuring beavers at Paradise Fields in Greenford - the first in the capital for nearly 400 years. The Ealing Beaver Project, funded by the Mayor's Green Roots Fund, is restoring wetlands and proving urban.
