

PEES Power Systems

**The photovoltaic panels broke
down during the warranty
period and no one repaired
them**

Overview

Explore repair options for cracked or shattered glass, seek professional assistance for electrical component repair, and consider salvaging still functional panels for off-grid systems or donation/resale opportunities. Customers usually face issues related to the warranty coverage time period, getting the warranty transferred from the previous owner, or disputes about whether the defect is covered under warranty. Broken or etched glass is often repairable by a trained technician. However, the task must take place off-site, which means you or the professional will have to remove. It means that after 25 years, the panel may produce energy between 80 and 85% of the first year, as most manufacturers' performance warranties suggest. Each aspect contributes significantly to how quickly a malfunctioning solar panel can. Consider factors such as the extent of the damage, warranty coverage, and cost analysis when deciding whether to repair or replace the damaged panels.
