The selling price of new solar panels in the United States

Overview

In the USA, the average cost of solar panels ranges between \$0.68 per watt in the United States. Department of Energy (DOE) Solar Energy Technologies Office (SETO) and its national laboratory partners analyze cost data for U.S. solar photovoltaic (PV) systems to develop cost benchmarks. Solar Photovoltaic System and Energy Storage Cost Benchmarks, With Minimum Sustainable Price Analysis: Q1 2023 details installed costs for PV. Solar panel costs range from \$16,600 to \$20,500 for the average 6.5 kW system, but prices can vary from as little as \$7,700 for smaller solar systems to upward of \$34,700 for larger systems. In that same year, solar energy accounted for 55 percent of new electricity-generating capacity additions in the North American country. Of the total solar capacity. The 2024 ATB presents capacity factor estimates that encompass a range associated with advanced, moderate, and conservative technology innovation scenarios across the United States.

The selling price of new solar panels in the United States

How Much Do Solar Panels Cost? - Forbes Home

To find the most up-to-date solar panel costs in 2025, we compared research from the U.S. Department of Energy and prices from 54 retailers and manufacturers for popular solar panel

Solar Panel Cost: How Expensive are Solar Panels?

Including installation, solar panels cost an average of \$2.33 and \$3.68 per watt in the United States. The price of a typical 5-kilowatt solar system, which includes additional components ...

Solar Panel Costs in 2026 : It's Usually Worth It

This guide explains the costs involved in going solar, factors that affect pricing, and how to decide if solar panels are the right choice for you.

Residential PV , Electricity ,

2024 , ATB , NLR

The 2024 ATB provides the average capacity factor for 10 resource categories in the United States, binned by mean GHI. The annual average capacity factor for the contiguous United States is ...

Solar panel cost in 2026: It may be lower than you think

Solar panels cost about \$30,500 on average--but often pay for themselves several times over through 25-30 years of electricity savings. Why trust EnergySage? If you've been putting off ...

How Much Do Solar Panels Cost? - Forbes Home

How much does it cost to get solar panels in different states? Solar ...

Residential solar market in the U.S.

Discover all statistics and data on U.S. residential solar photovoltaics now on

statista !

Solar Panel Cost Guide for 2025 by State

In 2025, you'll see average solar panel costs across the United States that reflect the unique characteristics of each region. Factors like local economic conditions, installation methods, and ...

How Much Do Solar Panels Cost in 2026?

How much does it cost to get solar panels in different states? Solar installation costs vary significantly by location due to differences in labor rates, local incentives, permitting fees and

As PV Market Evolved in the Last Year, Prices Went Up, Prices Went ...

The National Renewable Energy

Laboratory (NREL) has released its annual cost breakdown of installed solar photovoltaic (PV) and battery storage systems. U.S. Solar Photovoltaic ...

Solar Photovoltaic System Cost Benchmarks

Each benchmark system is representative of what is currently being installed in the United States and is defined in sufficient detail to assess the impact of system size, module efficiency, overhead, and ...
