# The village allowed the installation of photovoltaic panels

## Overview

---

The following are links to the Village of Bartlett solar panel system required submittals, plan review form and building permit application and checklist, which are used for all permits in the Village and those requiring plan review, including solar/photovoltaic installations. Solar, or photovoltaic (PV) panels as they're referred to in NFPA 1, Fire Code, are becoming more and more common on one- and two-family dwelling and townhouse roofs. Since the 2016 edition of NFPA 1, access pathways have been required on roofs to facilitate fire service access as well as egress. of a safety certificate to the Lands Department for record. The average imposed load should not exceed 150 fully extended area should not exceed half of the roof area. 5 high measured from the level of the roof of the structure. In the first half of 2024, 67% of electricity generation added to the American power grid was solar! With this trend expected to continue, many people are installing solar panels on their roofs to lower energy bills, increase property values, and take advantage of solar tax credits. It depends on where your association is located and what laws come into play. Conversely, an installation that negatively impacts the historic character of a property will not meet the Standards. But. Technically, no state outlaws or bans solar panels; quite the opposite. Most states have solar access laws that forbid any agreement, covenant, condition, bylaw, or contract that outlaws or limits solar installations by Homeowners Associations (HOA) or other municipal bodies.
