What are the business scopes of photovoltaic panels

Overview

The value chain of solar PV panels includes raw material suppliers, equipment suppliers, module manufacturers, distributors, and buyers that function in industrial, commercial, and residential markets. The increasing demand for renewable energy solutions, driven by climate change concerns. The global solar PV panels market size was estimated at USD 170.25 billion in 2023 and is projected to reach USD 287. It grows at a compound annual growth rate (CAGR) of around 15. Drawing from industry experience and modern software, we show how solar professionals build scalable, profitable operations. Accordingly four business models could be discovered in the markets which are explained through the following diagrams. Solar Co-operatives, Mo other renewable.
