What is the function of cylindrical lithium batteries

Overview

Cylindrical lithium-ion batteries are widely used rechargeable batteries characterized by their cylindrical shape, offering reliable energy storage and long cycle life. The outer casing is generally made from an aluminum-plastic composite pipe, which provides structural integrity and. Cylindrical lithium batteries are divided into different systems based on their cathode materials: lithium iron phosphate (LFP), lithium cobalt oxide (LCO), lithium manganese oxide (LMO), cobalt-manganese blends, and ternary (NMC) materials. The casing comes in two types: steel and polymer.
