

## PEES Power Systems

# What kind of photovoltaic panels should be installed

## Overview

---

Before deciding on a specific type of solar panel, it's best to first consider factors such as space on your rooftop, aesthetics, temperature resistance, warranty length, your budget, and overall cost versus return on investment expectations, said Rohit Kalyanpur, CEO of EnergySage. Before deciding on a specific type of solar panel, it's best to first consider factors such as space on your rooftop, aesthetics, temperature resistance, warranty length, your budget, and overall cost versus return on investment expectations, said Rohit Kalyanpur, CEO of EnergySage. Discover the six main types of solar panel, including thin-film, perovskite, and the best type for your home: monocrystalline. What kind of home do you live in?

When you're considering whether to get solar panels, it's a good idea to look into all the different types, to ensure you choose the best. Out of the three types of solar panels, monocrystalline are the most efficient, polycrystalline are the cheapest, and thin-film panels are the most portable. Why trust EnergySage?

The type of solar panel you need depends on the type of system you want to install. When deciding, consider factors like your budget, roof size, sun exposure, and energy efficiency goals. Before deciding on a specific type of solar panel, learning how to choose the best solar panels is an important step in creating a long-lasting, money-saving solar system.
