Where is the best place to get solar power

Overview

California is the best state overall for solar energy, while West Virginia is the worst. Many states fall somewhere in between for many different reasons, including cost, the number of solar jobs, the ratio of solar installations to household and more. Solar panels are becoming more popular every year. If you're looking to install solar panels on. Whether we're breaking down the new Inflation Reduction Act (IRA) to mine for hacks or giving you a step-by-step guide to starting a solar farm, we're all about maximizing the potential of solar and wind. Let's break down the reasons for which a state ends up in our Top 10. The most obvious one is the amount of sunlight that the area offers. Although Florida is not far behind with its fair share of annual sun, parts of California, Arizona, New Mexico, Texas, Nevada, Utah, and Colorado can generally.
