# Winter solar power generation efficiency

## Overview

---

Winter weather affects solar panel efficiency in different ways. Panels operate better when cool because heat reduces their electrical output. Solar panels convert sunlight into electricity using photovoltaic cells. Solar power is energy generated from sunlight and converted into electricity using solar panels, also known as photovoltaic (PV) modules. These panels are made up of individual solar cells, typically composed of silicon, that transform sunlight into usable energy. Optimize the Tilt Angle of Your Panels 4. Regularly Clean Snow and Debris 4.
